## SUMMARY

---

As a Front-End engineer, I bring over **8+ years of expertise** in crafting exceptional web applications. Proficient in HTML, CSS, JavaScript, and other technologies same as **Vue, React, and Flutter**.

Adept at **leading agile teams** to achieve outstanding results.

I possess a strong focus on **responsive design, performance optimization**, and ensuring **cross-browser compatibility**.

My passion lies in delivering seamless user experiences and fostering innovation within the front-end development realm. With a history of successful projects, I am dedicated to driving excellence in both **code quality** and **team collaboration**, consistently exceeding expectations

Looking forward to connecting with other professionals in the industry.

## EXPERIENCE

---

July 2024 –present

### Inklusiv

#### **Software Engineer L4**

- Develop and optimize **modern frontend applications** using React, TypeScript, Tailwind, and shadcn/ui.
- Collaborate with backend, design, and QA teams to deliver seamless features.
- Build and maintain **reusable component libraries** for faster development.
- Ensure **code quality and scalability** through reviews and best practices.
- Contribute to **architecture discussions** and support timely delivery.
- Provide **mentorship and guidance** to team members when needed.
- Lead sprint planning, estimation, and coordination with cross-functional teams.
- Monitor delivery progress, ensuring features are shipped **on time with high quality**.

Nov 2023 –July 2024( 9 Months)

### Abgad

#### **Frontend Engineering Lead**

- Working using Agile methodology
- Contribute to the design, estimation, planning, and implementation as well.
- Contribution on updating new features in an existing React website & React Native mobile application
- Contribution on creating new flutter application with new UI facelift & new features

Dec 2021 – Nov 2023 [TurnDigital](#)

(1yr 11 Months)

### Frontend Engineering Lead

- Working using Agile methodology
- Contribute to the design, estimation, planning, and implementation as well.
- Assisting in defining software architectures – Collaborating with leads to explore existing systems, determining areas of complexity, potential risks to successful implementation, and learning the application's capabilities.
